Submitting a paper to Macroeconomics and Finance in Emerging Market Economies

Aims and Scope
Macroeconomics and Finance in Emerging Market Economies aims to be a definitive source of information for economists, bankers and financial experts and a forum where they can learn from each other. In addition to providing strong analysis and independent evaluation of current economic trends, this international journal offers practical advice, useful information and specific application recommendations. All of this supports high quality, peer-reviewed articles by skilled academics, industry experts and users on all aspects of money and finance.

Macroeconomics and Finance in Emerging Market Economies invites original research contributions on all aspects of macroeconomics and finance and their interaction. Potential topics include growth, macrofoundations of macroeconomics, monetary, exchange rate and fiscal policy in an open economy, currency and financial crises, regulation, banking, capital and forex markets, corporate finance and governance. Rapid opening out, changes in financial flows, and evolving markets and regulation in emerging economies pose valuable research questions for which this international journal provides a forum. Theoretical and empirical papers of diverse yet rigorous methodologies are welcome. We are particularly interested in papers that are conceptually innovative and relevant in the context of emerging economies. Contributions by academics, industry analysts, as well as policy makers are solicited in order to provide alternative perspectives and an unbiased assessment of current trends for a wide variety of users.
