Abstracting and indexing services
Research in Mathematics Education is currently noted in the following: British Education Index; Contents Pages in Education; Educational Research Abstracts Online (ERA).

Submiting a paper to Research in Mathematics Education

The instructions below are specifically directed at authors that wish to submit a manuscript to Research in Mathematics Education.

For information about writing an article, preparing your manuscript and general guidance for authors, please visit the Author Services section of our website (http://journalauthors.tandf.co.uk).

Aims and Scope
Research in Mathematics Education is an international English language journal, publishing original refereed articles on all aspects of mathematics education. Papers should address the central issues in terms which are of relevance across educational systems and informed by wider thinking in the field. The journal has three sections, covering research papers, book reviews, and current reports. The Research Papers section contains reports of studies involving empirical investigation and theoretical argumentation from which conclusions and implications can be drawn for future research and practice. The Current Reports section contains two-page summaries of research papers which have been recently published in the online informal proceedings of the meetings of BSRLM. The Book Reviews section contains reviews of recent publications in the field. Research in Mathematics Education is the official journal of BSRLM, the British Society for Research into Learning Mathematics.

Preparing and submitting your manuscript

Before preparing your submission, please visit the Research in Mathematics Education handbook at http://www.tandf.co.uk/journals/rrme for full instructions for authors, including a complete style guide.

Papers for consideration should be submitted to the Editor. Submissions should be made in three Microsoft WORD documents, which should be attached to an email message. If email submission is not possible, please send an electronic version on disc or CD-ROM along with three paper copies, together with one set of high quality figures for reproduction, to the address below.

Editorial Office:
The Editors (Attention: Elena Nardi)
Research in Mathematics Education, School of Education, University of East Anglia, Norwich, NR4 7TJ, UK.
Email: rme@uea.ac.uk

Please make sure that your contact details are clearly visible on the outside of all packages you send to the Editorial Office.

Submitted manuscripts are subject to peer review at the discretion of the Editorial Office. In order to maintain anonymity during the refereeing process, authors are requested to refrain from, or keep to a minimum, self-referencing.

There are no page charges in Research in Mathematics Education.

Copyright

It is a condition of publication that authors assign copyright or licence the publication rights in their articles, including abstracts, to the British Society for Research into Learning Mathematics (BSRLM). This enables the Publisher, on behalf of BSRLM, to ensure full copyright protection and to disseminate the article, and of course the Journal, to the widest possible readership in print and electronic formats as appropriate. Authors retain many rights under the Taylor & Francis rights policies, which can be found at www.informaworld.com/authors_journals_copyright_position. Authors are themselves responsible for obtaining permission to reproduce copyright material from other sources.

Reprints

Corresponding authors can receive 50 free reprints, free online access to their article through our website (www.tandf.co.uk/journals/rrme) and a complimentary copy of the issue containing their article. Complimentary reprints are available through Rightlink® and additional reprints can be ordered through Rightlink® when proofs are received or alternatively on our journals website. If you have any queries, please contact our reprints department at reprints@tandf.co.uk.
